Credential Boosters

Online Credential Boosters Courses These classes are designed to help you get your program aligned with Maryland EXCELS and to help you reach higher Maryland Child Care Credential levels. Credential Boosters are classes that are identified by Maryland State Department of Education (MSDE) in the staff credential modifications for levels 2, 3, and 4. To view full course descriptions for the classes listed below, please visit HowardCC.edu/Childcare Courses. Note the following about these courses:

- You can complete online Credential Boosters at your own pace, with instructor guidance; courses are 2, 3, or 5 hours. Course hours are listed in the course descriptions below.

These classes are designed to help you get your program aligned with Maryland EXCELS as well as to help you reach higher Maryland Child Care Credential levels. Credential Boosters are classes that are identified by MSDE in the Staff Credential.

Career Development / Licensure & Certification

Modifications for levels 2, 3 and 4. For complete list of credential booster classes please contact Christa Snyder at 301-784-5530 or casnyder@allegany.edu

Please note the following about these courses:

You can complete online Credential Boosters courses at your own pace, with instructor guidance; each one

- Takes approximately three hours to complete (completion times may vary).
- You will need access to a computer, the internet, and email to take an online Credential Boosters course.
- No refunds or transfers. No assignment deadline extensions.
- Textbooks must be purchased prior to class (unless provided)

General guidelines for online classes: You will need access to a computer, the internet and Email to take these courses; sufficient computer skills are required, including using a word processing program to write and save your work on your computer. Provide your email address with your registration so we can send you log in instructions. Online classes fill up quickly, so please register early!

Deadline to register 2 weeks prior to start of each class.

DISPENSARY

Dispensary Technician I (DHR870)

Do you have an interest in wellness, and would you enjoy providing excellent customer service in a medical dispensary? If so, you may be interested in a career in the new and rapidly growing medical cannabis industry. There are already over 100 dispensaries in Maryland, and demand for qualified Dispensary Technicians is increasing. This course is the first of two in a series and provides the training you need to work in a medical cannabis dispensary. You will learn an overview of the Dispensary Technician's role, practice professional skills and responsibilities involved in day-to-day operations, and learn Maryland regulations for dispensary operations including security, inventory management, software types, recordkeeping, and patient management from check-in to check-out, and follow-up. Class sessions are conducted in Zoom and Canvas; you will receive links and instructions one week before the class begins. Register for both DHR 870 and DHR 871; successful completion of both classes is required to earn the Dispensary Technician certificate. 30 hours, 3.0 CEUs.

1/12-3/2 M/W

ONLINE
Course Cost: \$400
Maryland Senior Course Cost: \$395

Dispensary Technician II (DHR871)

This course is the second in a series and is designed to provide occupational training to work in a medical cannabis dispensary. This course focuses on medicinal knowledge, patient care and education aspects of the Dispensary Technician's role. Topics include: recent research on medicinal cannabis, medicinal properties of cannabis, managing the patient experience, counseling methodology and practices. Class sessions are conducted in Zoom and Canvas; you will receive links and instructions one week before the class begins. Register for both DHR870 and DHR871; successful completion of both classes is required to earn the Dispensary Technician certificate. 30 hours, 3.0 CEUs.

SECURITY GUARD TRAINING

Security Guard Training- Entrance Level (PRO400)

As of January 1, 2025, Security Guards in Maryland are required to be certified according to the state's legal requirements and MD Business Occupations and Professions Code § 19-412 (2024). While training has always been in place, training approved by Maryland Police Training and Standards Commission is now a requirement to apply for the mandated Security Guard certification. This training is for Security Guards currently employed or individuals seeking employment by Maryland Security Guard Agencies or Employers and does not include certification for chemical agents, handcuffing, or firearm techniques.

This initial training is required for Maryland Security Guard Certification and is valid for three years. In-service classes will be available and are required to renew the certification. Additional courses to complement certification are available such as CPR and First Aid. Please contact dumstot2@allegany.edu or 301-784-5365 with questions.

This initial training is 12 hours total classroom time, 6 hours each day. All course materials are included in the cost.

Training includes:

- relevant criminal law
- the appropriate use of force
- the use of alternatives to force
- the use of de-escalation techniques
- promoting appropriate interactions with individuals who are under 18 years of age; have behavioral health or other disabilities; or are in crisis.

Anyone who wishes to be certified as a Security Guard in Maryland, must meet, and maintain the following qualifications:

- be at least 18 years old
- meet the standards set by the Secretary
- be a current employee of or an applicant for employment with a licensed security guard agency or a security guard employer
- be of good moral character and reputation
- has not been convicted of a disqualifying crime, under § 5-101 of the Public Safety Article
- has not been convicted of a crime of violence, under § 14-101 of the Criminal Law Article

DRONE

Drone Pilot Training (PRO426)

Drone Pilot Training is an 8-week course that will provide students with the skills and knowledge needed to safely and legally operate a Small Unmanned Aerial System (sUAS) commonly referred to as a drone. Further, it will provide you with the necessary information required to pass the initial Federal Aviation Administration (FAA) Aeronautical Knowledge Examination and obtain an FAA sUAS Pilot's

certificate. Hands-on flying will enhance your knowledge by giving you the experience of flying a rotary-winged sUAS, which will be furnished for your use while participating in this course. This course focuses on the rules and regulations regarding the operation of the Unmanned Aerial Vehicles (UAVs) operating in the National Airspace under 14 C.F.R Part 107. You will learn the responsibilities of being a Remote Pilot in Command and using the methodology of Crew Resource Management, Aeronautical Decision Making, and Risk Management to conduct safe sUAS flight operations. This course also provides the students with classes on weather reports, basic aerodynamics, airspace use, reading aeronautical charts, airport operations, maintenance, emergency procedures, Certificate of Authorization and other pertinent information regarding the safe flight and operation of small unmanned aircraft. The course will include equal time in classroom as well as flying time outdoors and is open to anyone, regardless of skill level and recreational or commercial sUAS Piloting interest.

4/7-5/28, T/TH (16 sessions)

TRANSPORTATION

Allegany College of Maryland has partnered with Garrett College to provide Commercial Driver License (CDL) training in our region. The profession truck driving curriculum prepares students for entry-level positions in truck driving through topics like pre-trip inspection, yard skills, and over-the-road training, map reading, and log books.

Successful completion leads to DOT certification and obtaining a CDL license through the Maryland Department of Motor Vehicles. Training for Class-A is 210 hours (30 days) and Class-B is 49 hours (6 days).

Program Entry Requirements

- Must currently possess a valid (nonprovisional) license and be 18 years of age.
- Must be able to pass a Department of Transportation (DOT) physical which cannot expire during the training period.
- Drug screen which must be less than sixty (60) days old and cannot expire during the training period.
- Must communicate in the English language sufficiently, as required by the U.S. Department of Transportation.
- Must obtain a CDL Learner's Permit.
- Students are required to have a High School Diploma or equivalent.
- Students are required to take the TABE Assessment prior to enrollment.
- Students must maintain a 75% average on quizzes and tests in each class and meet attendance requirements.
- Students must participate in an Orientation and Information session.
- A \$25 non-refundable registration fee is required from all students.

For more information, please call David Smarik at 301-784-5077.

Career Development / Licensure & Certification

OCCUPATIONAL TRADES

Backflow Prevention/Cross Connection Training and Recertification

Cohorts are being formed for the required training and education to those who alter, install or inspect potable or non-potable water supply systems. The class will be held in the fall once a minimum of six participants have enrolled. For more information on being part of the cohort please contact Gracie McLeod at mmcleod14238@allegany.edu or 301-784-5126.

Backflow Prevention/Cross Connection Training (PRO171)

Total Course Cost: \$480

Maryland Senior Course Cost: \$475

Limited Scholarships available to Allegany County residents! (3 or more years residency)

Backflow Prevention/Cross Connection Recertification Training (PRO214)

Total Course Cost: \$105

Maryland Senior Course Cost: \$100

The following course is offered in cooperation with the Maryland Center for Environmental Training

The Maryland Center for Environmental Training offers training at sites throughout Maryland. Training is approved by the State of Maryland for water and wastewater operator certification

renewal. MCET also provides on-site technical assistance to Maryland's communities and businesses. We help them implement operational and financial strategies to ensure that water and wastewater treatment facilities fully comply with the stringent provisions of the Safe Drinking Water Act and the Clean Water Act.

Need additional course information? Call 301-934-7507

Aeration of Activated Sludge, BNR and ENR Processes (PRO311)

Various technologies are used to aerate activated sludge processes, including Biological Nutrient Removal (BNR) and Enhanced Nutrient Removal (ENR) processes. Various aeration options currently used, available, and evolving for activated sludge, BNR, and ENR processes will be covered in this course. Specifically, types of aeration diffusers (mechanical, fine bubble, and membranes) and blowers (positive, multistage, single stage, and high speed) will be addressed.

The influence of MCRT and MLSS will also be addressed as to the efficiency ease (or difficulty) and cost of aeration. Airflow rate requirements and their calculations will be discussed in depth. Diffuser fouling and scaling issues will be discussed. Finally, helpful operating hints will be provided based on experiences from operating facilities. LEADERSHIP / MANAGEMENT

Robert Godfrey graduated from Alderson-Broaddus University with a bachelor's degree in social work and from West Virginia University with a master's degree in social work. Over his career, he has worked in adolescent group homes, psychiatric hospitals, outpatient mental health clinics, special education schools, and has managed services to adults with developmental disabilities.

He has employed team building exercises into nearly every one of his employment sites and is in high demand as a facilitator. Robert brings energy and enthusiasm to every interaction. He has a passion for seeing groups learn and grow in a caring, safe, and encouraging environment.

radioACTIVE (PRO163)

How do we impact our co-workers? How do we impact our world?

radioACTIVE partners with you to assist your group in moving toward a collective vision and relationship through collective experiences and discussions.

The radioACTIVE experience starts with an assessment. Together, we will discuss goals for what you want to accomplish. Your assessment includes a discussion of the abilities of the participants, so no one feels left behind or unable to complete the experience. From start to finish, you will take ownership of the plans.

For more information on group trainings, contact Diana Umstot at 301-784-5365 or dumstot2@allegany.edu.

HEART OF A LEADER (PRO990)

NO LECTURES. NO POWER POINTS. NO FLUFF.
HIGH STANDARDS. FULL ENGAGEMENT & PARTICIPATION.
REAL-LIFE APPLICABILITY. PERSONAL & PROFESSIONAL RESULTS

Join us in SPRING 2026 for a LIFE-CHANGING Experience!!!

Life is full of challenges, opportunities and excitement – so is this training! If you're prepared to move your life forward and discover the secrets of living a purpose-driven & regret-free life, then this 2-day journey of personal discovery is for you. It is one of the most unique, challenging, and effective Leadership trainings that is available in the world today. I will not say that the 2-day journey will be easy, but I will say that it will be worth it – personally and professionally.

During this life-enhancing training you will learn to:

- *Identify and expose barriers to your leadership abilities and discover the unlimited power of self-belief to break through them!*
- *Embrace change and improve your decision-making ability*
- *Learn to get out of your head and into your heart*
- *Accept responsibility for where you are in life – professionally & personally*
- *Reclaim your identity of who you are and what you want to become*
- *Design a positive vision for your life and create a plan of action to achieve it*
- *Develop your ability to think creatively – focusing on solutions vs. problems*
- *Communicate more effectively with friends, family, and coworkers*
- *Live life with enthusiasm and passion all while getting RESULTS!*

We are all remembered for the daily actions that we take versus what we talk about. This training is about eliminating excuses and blame from your life, deciding what your life will represent and then taking positive action towards that vision.

How do YOU want to be remembered in life?

We challenge you to **invest** in yourself to experience this spectacular opportunity! This training was developed by **Brandon W. Johnson**, a.k.a. "Positive Energy Guy," and has been entrusted into the hands of Robert Godfrey to continue to develop leaders in our community. Robert is a 2015 graduate of Heart of a Leader (Team #515) and a 2019 graduate of Heart of a Warrior (Tribe #29). Since graduating from these programs, he has been an asset and resource helping to continue this program in our area. Now it is his turn to help you bring out the best leader within yourself!

For More Information, please contact Diana Umstot at 301-784-5365 or dumstot2@allegany.edu. **Deadline to register: April 1, 2026.**

INSURANCE

Continuing Education course will once again be offered in partnership with SERVPRO.

Insurance Ethics

(PRO220)

Facing ethical decisions can be very difficult, especially when we make decisions that may seem right at first, but in hindsight may not have been not that great after all. As we explore what "Ethics" is, you will participate in hourly group activities that will challenge you to find ethical solutions to various scenarios. These challenges will reinforce what you have learned throughout the course, as well as increase your ability to use ethical decision-making within your day-to-day life.

3/24, Tuesday (1 session)

9:00 AM-12:00 PM

(Sign-in begins at 8:30 AM)

ACM: CE Bldg.

Instructor: Tim Duck

Course Cost: \$5

A lunch will be provided between this class and the next class for students that sign up for all classes on March 24th.

Water Mitigation Awareness and Response Seminar

(PRO420)

This course is designed to assist you in understanding what to expect from a good restoration professional, by reviewing industry standards applicable to water damage losses.

3/24, Tuesday (1 session)

1:00 PM-2:00 PM

WELDING

Shielded Metal Arc Welding (VTE711)

This 80-hour course will provide participants with a thorough, technical understanding of shielded metal arc welding, welding safety, power sources (AC and DC), electrode classifications, and electrode selection (E6010 & 7018). It also provides training to develop the skills necessary to make quality shielded metal arc welds in all positions (flat, horizontal, vertical up, and overhead) on mild 3/8-inch steel. Single and multiple passes using mild steel, low hydrogen, and iron powder electrodes will be covered. Upon successful completion, the student should be able to perform production welding, millwright work, and general maintenance welding. In preparing for your welding course, you must provide leather welding gloves, protective eyewear, welding helmet, and welding jacket. The Welding Starter Package must be purchased if you don't have the necessary gear.

2/16-4/29, M/W (20 sessions); No class
3/9 & 3/11

5:00PM-9:00 PM

Western Maryland Works - LaVale, MD

Instructor: Gary Taylor

Course Cost: \$1,650

Maryland Senior Cost: \$1,640

Welding Start Package*: \$245

Shielded Metal Arc Certification (VTE714)

This 40-hour course will provide training for experienced and trained welders in preparing for certification testing in the shielded metal arc welding process. Test certification will be performed on 3/8-inch steel plate. You will prepare to test in two positions: vertical up and overhead passes. You will also practice welding on test plates to prepare for the final testing. All certification testing will be performed by a Certified Welding Inspector under American Welding Society (AWS) welding specifications and procedures.

5/4-6/8, M/W (10 sessions)

5:00 PM-9:00 PM

Western Maryland Works - LaVale, MD

Instructor: Gary Taylor

Course Cost: \$599

Certification Testing Fees: \$400 (Fee includes vertical and overhead tests, certification papers, and ID card)

Laser Welding and Welding Bootcamp Courses still being formed at this time.

Career Development / Licensure & Certification

MIG/TIG Welding (VTE748)

This 40-hour intermediate course is for the welder with basic welding experience. You will train in welding safety, gas metal arc welding (GMAW-MIG), and gas tungsten arc welding (GTAW-TIG) processes. The course includes metal arc transfers of short-circuiting, globular, spray arc, and power mode. Also included is instruction in how various shielding gases affect gas metal arc and gas tungsten arc welding. Hands-on experience will be dedicated to welding on basic carbon steel using edge, corner, lap, and fillet welds in all positions. Welding is limited to regular thin, flat material and does not include thick plate, pipe, or other irregular shapes. In preparing for your welding course, you must provide the following items: leather welding gloves, protective eyewear, welding helmet, and welding jacket. The Welding Starter Package must be purchased if you don't have the necessary gear.

2/17 -3/26, T/TH (10 sessions); No class 3/10 & 3/12

5:00 PM -9:00 PM

Western Maryland Works – LaVale, MD

Instructor: Harry Riggleman

Course Cost: \$950

Maryland Senior Course Cost: \$940

Welding Starter Package*: \$245 Welding

MIG/TIG Certification (VTE854)

This 40-hour course will provide training for experienced and trained welders in preparing for certification testing in gas metal arc welding (GMAW-MIG) and gas tungsten arc welding (GTAW-TIG) processes. Test certification will be performed on 3/8-inch carbon steel plates in vertical and overhead positions. Hands-on experience will include practicing on test plates in preparation for final testing. All certification testing will be performed by a Certified Welding Inspector under American Welding Society (AWS) standards.

3/31-5/5, T/TH (10 sessions);

No class 4/2

5:00 PM-9:00 PM

Western Maryland Works – LaVale, MD

Instructor: Harry Riggleman

Course Cost: \$599

Certification Testing Fee: \$600

(Fee includes vertical and overhead tests in MIG & TIG, certification papers and ID card.)

Maryland Senior Course Cost: \$589
(plus testing fees)

***Welding Starter Packages are highly encouraged but no obligatory; however, students must arrive to class equipped with the same materials and items.**

Career Development / Licensure & Certification

MACHINING

Machinist Program

4/7-11/25, M-TH

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$9,000

Machinist Foundations (MTT-120)

This foundational course teaches the fundamentals of machining, from safe shop practices to the proper use of hand tools and measurement equipment. Students will work directly with common materials, developing the accuracy and confidence required in modern manufacturing. Upon completion, participants are well-prepared to continue into advanced manual and CNC coursework.

Students will have the opportunity to earn the following NIMS credentials: *Measurement, Materials, & Safety, and Job Planning, Benchwork, & Layout.*

4/7-5/8, M-TH

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,000

Manual Machining – Milling

(MTT-121)

Gain hands-on experience operating milling machines and drill presses in a controlled shop environment. Students will learn how to properly set up equipment, select appropriate feeds and speeds, and apply safe and accurate machining techniques. Throughout the course, participants will machine precision components using standard industry practices that build confidence for more advanced machining work. Students will have the opportunity to earn the following NIMS credentials: *Drill Press I, and Milling I. MTT-120 is a prerequisite or by instructor approval.*

5/12-6/19, M-TH

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,400

Manual Machining – Turning

(MTT-122)

Advance your manual machining skills through hands-on instruction in lathe turning operations and techniques. This course emphasizes achieving proper surface finish, maintaining tight tolerances, and producing parts with high dimensional accuracy. Students will continue building their precision machining abilities while preparing for more advanced manufacturing applications. Students will have the opportunity to earn the following NIMS credentials: *Turning I (Between Centers), and Turning I (Chucking). MTT-120 is a pre-requisite or by instructor approval.*

6/23-7/30, M-TH

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,400

Career Development / Licensure & Certification

Precision Grinding (MTT-123)

Learn the fundamentals of precision surface grinding and finishing. Students will perform machine setup, wheel selection and dressing, accuracy alignment, and flatness/parallelism control. This module focuses on achieving tight tolerances, fine surface finishes, and safe grinding practices. Grinding is delivered as its own standalone module due to the specialty skills and equipment involved. Students will have the opportunity to earn the following NIMS credential: *Grinding I*. **MTT-121 and/or MTT-122 is a pre-requisite or by instructor approval.**

8/4-8/19, M-TH

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,000

CNC Milling (MTT-124)

This comprehensive CNC Milling course integrates both machine operations and programming into one streamlined training experience. Students will learn how to properly set up CNC mills, establish coordinate systems, select tools, and apply effective workholding techniques. Instruction covers foundational G-code programming as well as generating toolpaths through CAM software. Students will have the opportunity to earn the following NIMS credentials: *Drill Press I*, and *Milling I*. **MTT-120 & MTT-121 are pre-requisites.**

8/24-9/29, M-TH;

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,600

CNC Turning (MTT-125)

This CNC Turning course integrates both operational skills and programming into one cohesive training module. Students will learn how to perform complete lathe setup, select appropriate tooling and workholding, and execute OD/ID turning, threading, and finishing cycles. Training includes writing and modifying G-code programs as well as using part probing for accurate setup and verification. Students will have the opportunity to earn the following NIMS credentials: *CNC Lathe Operations*, and *CNC Lathe Programming*. **MTT-120 & MTT-122 are pre-requisites.**

9/30-11/5, M-TH;

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,600

Career Development / Licensure & Certification

Quality Inspection & Special Merit (MTT-126)

This capstone module provides advanced training in quality assurance, blueprint interpretation, and geometric dimensioning and tolerancing (GD&T). Students will deepen their understanding of part specifications and learn how to verify dimensional accuracy using industry-standard inspection tools. The course is ideal for experienced machinists or individuals preparing for roles in inspection, metrology, or quality control. Emphasis is placed on precision measurement,

documentation, and ensuring compliance with manufacturing and engineering standards. Students will have the opportunity to earn the following NIMS credentials: *Certificate of Special Merit (Quality Inspector)*. **MTT-124 and/or MTT-125 is a pre-requisite or by instructor approval.**

11/9-11/25, M-TH;

4:00 PM-8:30 PM

Western Maryland Works - LaVale, MD

Instructor: TBD

Cost: \$1,000

Milling, Lathe, & CAD Bootcamps may be available upon request.
Bootcamps are not scholarship applicable.

Forklift Certification (VTE400)

This course aims to equip students with the necessary skills to operate an industrial powered forklift safely and effectively. It complies with 29 CFR 1910.178, OSHA Powered Industrial

Truck Operator Training Standard.

Participants will engage in formal classroom instruction, hands-on practical training, and a final evaluation. Those who successfully complete the

course will be awarded a certificate of training along with a wallet card. Key topics covered include pre-inspection procedures, loading and unloading techniques, maneuvering and operational skills, relevant rules and regulations, and a strong focus on safety practices. Course costs include the certification, safety helmet, and safety vest.

Dates available to employers upon request

Western Maryland Works - LaVale, MD OR on job-site

Instructor: Henry Cook

Course Cost: \$255

Career Development / Licensure & Certification

OSHA

OSHA 10 – General Industry

(VTE-500)

This course provides essential safety and health training designed to help workers, particularly those new to the workforce, recognize and address workplace hazards. The program includes a comprehensive introduction to OSHA, detailing workers' rights, employer responsibilities, and the procedures for lodging complaints. It also covers a range of general safety and health risks, such as slips, trips, falls, electrical hazards, and ergonomic concerns. Participants learn about the correct usage and types of personal protective equipment (PPE) and gain insights into hazard communication, which includes understanding chemical labels and Safety Data Sheets (SDS). The course further emphasizes the safe handling of hand and power tools.

Date: TBD

Western Maryland Works - LaVale, MD

Instructor: Terrance Steele

Course Cost: \$105

Maryland Senior Course Cost: \$100

OSHA 10 – Construction

(VTE-501)

This course provides foundational safety and health training for individuals entering the construction industry. It is especially valuable for new workers, helping them identify, avoid, and prevent common job site hazards. The course begins with an overview of OSHA, including workers' rights, employer responsibilities, and how to file a safety complaint. Key construction-related topics include fall protection, ladder and scaffold safety, electrical hazards, and proper use of

personal protective equipment (PPE). Participants will also learn about hazard communication, including how to read chemical labels and Safety Data Sheets (SDS), and gain practical guidance on the safe operation of hand and power tools commonly used in construction settings.

Date: TBD

Western Maryland Works - LaVale, MD

Instructor: Terrance Steele

Course Cost: \$105

Maryland Senior Course Cost: \$100

OSHA 30 – Construction (VTE-502)

The OSHA 30-Hour Construction Industry Outreach Training Program is a comprehensive safety course designed for supervisors and workers with safety responsibilities in the construction industry or those wishing to further their career into supervision or safety responsible persons. This includes individuals involved in construction, demolition, renovation, and building development of all types.

Date: TBD

Western Maryland Works - LaVale, MD

Instructor: Terrance Steele

Course Cost: \$205

Maryland Senior Course Cost: \$200

Career Development / Licensure & Certification

WELDING SCHOLARSHIP OPPORTUNITY!

The Wilson Supply/Veryl Morgan Scholarship memorial award honors Veryl Morgan's dedication and long-term service to Wilson Supply. The Scholarship is awarded to Allegany County continuing education students in the fall and spring semesters. Please submit application letter indicating why you are interested in welding; why you are the best candidate for the award; and enrollment date to:

Wilson Supply/Veryl Morgan Scholarship Fund

c/o Shea Bonarigo,

Allegany College of Maryland Center for Continuing Education

12401 Willowbrook Road • Cumberland, MD 21502

THANK YOU, WILSON SUPPLY COMPANY

For Providing the Endowed Wilson Supply/Veryl Morgan Scholarship Fund

TRADE SCHOLARSHIP OPPORTUNITY!

The Park Place Church Women's Group Trade Scholarship award will be granted once a year in later August to mid-September to an individual who demonstrates financial need and is pursuing a welding or NIMS certification in welding, machining, industrial maintenance, or robotics. Both males and females are eligible to apply. Please note that bootcamps are not eligible for this scholarship.

Park Place Church Women's Group

Career Development / Licensure & Certification

WESTERN MARYLAND WORKS

at ALLEGANY COLLEGE of MARYLAND

37 Lane Avenue, LaVale, Maryland 21502

Western Maryland Works is a local community **Makerspace**, located at 37 Lane Avenue in LaVale, Maryland, that is a shared, hands-on creative workshop where people of all backgrounds and skill levels come together to learn, design, and build. It offers access to tools and technology such as a 3D printer, CNC machine, woodshop equipment, embroidery machine, and more that is paired with instructors who provide guidance and support. Use the QR code or log into the Allegany College of Maryland/Makerspace webpage <https://www.allegany.edu/western-maryland-works/makerspace.html> to schedule your trainings or workshop. **Our Booking system opens registration 30 days in advance.** You don't need a membership for workshops or training, but many participants become members so they can keep creating on their own time. **If you have any questions, please contact Makerspace at 301-784-5236.**

DIGITAL FABRICATION LAB TRAININGS – EXACT DATES CAN BE FOUND ON BOOKINGS - \$10 per training

File Discovery and Formatting for Makerspace Machines

Ideal for anyone who wants to make things but isn't sure how to create their own designs. This training teaches you how to find and prepare files for use on Makerspace machines. You will learn where to safely download free or licensed files, and how to identify correct file types for each machine. Prerequisite: Basic computer skills are required Duration: Approximately 1 hour

Laser Engraver Training

Learn to design, cut, and etch with precision. Our Laser Engraver Training introduces you to the basics of laser cutting and engraving. In this hands-on training, you will learn how to safely operate the machine, set up your files, and choose the right materials for your projects. We'll cover setup, calibration, and maintenance tips. Prerequisite: None - beginners welcome! Duration: Approximately 1 hour

Career Development / Licensure & Certification

3D Printer Training

Turn your digital ideas into real-world objects. Our 3D Printer Training introduces you to the fundamentals of additive manufacturing. Learn how to prepare 3D models, slice files for printing, and operate our printers safely and effectively. Whether you're prototyping a product, replacing a part, or creating art, this training gives you the knowledge and confidence to bring your designs to life layer by layer. Prerequisite: None - perfect for beginners! Duration: Approximately 1 hour (depending on the amount of participants)

Embroidery Machine Training

Transform your designs into stitched works of art. Our Embroidery Machine training teaches you how to turn digital artwork into beautifully embroidered creations. Learn to operate the embroidery machine safely, select suitable fabrics and threads, and use design software to import patterns. Prerequisite: None - beginners welcome! Duration: Approximately hours 2

UV Printer Training

Print vibrant designs directly onto almost any material. This class introduces you to the world of UV printing - a fast, precise way to apply full-color graphics to wood, metal, glass, acrylic, and more. Learn how to set up files, prepare the printer, and choose the right print settings for stunning results. Prerequisite: None - beginners welcome! Duration: Approximately 1 hour

Banner (etc.) Machine Training

Create professional-quality banners, stickers, magnets, t-shirts and signs. Our Banner Machine training guides you through the process of setting up your files, printing, and cutting graphics. Learn how to set up the printer, choose the right materials, and produce vibrant, durable items for events, businesses, and creative projects. Prerequisite: None - open to all skill levels! Duration: Approximately 1 hours

WOODSHOP TRAINING – EXACT DATES CAN BE FOUND ON BOOKINGS - \$20 per Training

Fundamentals of Hand Tools

Build confidence using the essentials of traditional woodworking. This hands-on training introduces you to the core tools every woodworker should know, from chisels and hand planes to measuring and marking tools. Learn proper handling, sharpening, and safety techniques while practicing basic joinery and shaping methods. Prerequisite: None - great for beginners! Duration: Approximately 2.5 hours

Fundamentals of Power Tools

Learn the tools that make woodworking faster, easier, and more precise. In this training, you'll get hands-on experience with the most commonly used power tools in the woodshop. We'll cover operation, safety, and maintenance of drills, sanders, circular saws, jigsaws, and more. You'll learn how to select the right tool for each job and practice techniques. Prerequisite: None - great for beginners! Duration: Approximately 2 hours

Career Development / Licensure & Certification

Fundamentals of

Table Router Techniques

Shape, trim, and detail your projects with precision. This training introduces you to one of the most versatile tools in the woodshop - the table router. Learn how to safely set up and operate the router, choose the right bits, and use guides and jigs for accurate results. You'll practice edge profiling and pattern cutting techniques to give your woodworking projects a professional finish.

Prerequisite: None - great for beginners!

Duration: Approximately 2.5 hours

Fundamentals of the

Wood Joinery

Create smooth, straight edges for flawless joints. In this training, you'll learn how to use the jointer to prepare boards for precise glue-ups and clean, professional finishes. We'll cover machine setup, adjustment, and safe cutting techniques, along with how to properly joint edges and faces to achieve perfectly flat, square surfaces.

Prerequisite: None - great for beginners!

Duration: Approximately 2 hours

Fundamentals of Lathe Turning

Turn raw wood into smooth, sculpted forms. This hands-on training introduces you to the art of woodturning. Learn how to safely operate the lathe, select the right chisels, and shape wood. You'll explore tool control, speed selection, and finishing techniques that give your turned pieces a professional look.

Prerequisite: None - great for beginners!

Duration: Approximately 2.5 hours

Fundamentals of Wood Finishing

Bring out the beauty and character of your work. This training covers the essential techniques for finishing wood projects like a pro. You'll learn how to prepare surfaces, choose the right stains, oils, and sealants, and apply finishes that enhance both durability and appearance. We'll explore different methods, from hand-rubbed oils to spray finishes, and discuss how to achieve smooth, consistent results every time. Prerequisite: None - open to all skill levels Duration: Approximately 2.5 hours

CNC Router Training

Combine technology and craftsmanship for precision woodworking. Our CNC Router training introduces you to computer-controlled cutting and carving. You'll learn how to prepare digital design files, set up materials, and safely operate the CNC router. This training bridges design and production. Prerequisite: Basic computer skills are required Duration: Approximately 4 hours (2 hours per day)

Fundamentals of Wood Types and Uses

Understand the materials that bring your projects to life. In this training, you'll explore the unique characteristics of hardwoods and softwoods and learn how to choose the right type of wood for your project. Discover how grain patterns, density, moisture content, and workability affect design, durability, and finishing results. Prerequisite: None - ideal for beginners and hobbyists Duration: Approximately 2.5 hours

Career Development / Licensure & Certification

MAKE AND TAKE WOODSHOP WORKSHOPS

(Be sure to check the website calendar. There is always more creative fun happening than what's listed in our catalog!)

Our booking system opens registration 30 days in advance of each workshop.

Make & Take Triangle Clock

1/9 & 3/16, 6-8:30pm Cost: \$30.00

Create a functional and stylish timepiece! In this hands-on workshop, you will design and build your own modern triangle-shaped wooden clock using a combination of power tools and hand tools. You'll practice your skills of measuring, cutting precise angles, sanding, assembling, and installing clock hardware.

Experience Level: Beginner-friendly

Make Your Own Key Rack

2/16 & 3/30, 6-8:30pm Cost: \$20.00

A fun and functional woodworking project! In this hands-on workshop, you'll design and build your own custom wooden key rack, perfect for keeping keys organized and adding a personal touch to your home. Our instructors will walk you through the entire process and you will leave with a finished, wall-ready key rack.

Experience Level: Beginner-friendly

Make Your Own Spinner

4/18, 1-5pm Cost: \$40.00

Fun, fast, and full of motion! In this engaging workshop, you will create your own wooden spinner while learning basic woodworking and assembly skills along the way. Our instructor will guide you through each step and you will leave with a finished, fully functional spinner, great for patio and porch decoration.

Experience Level: Beginner-friendly

Make & Take a Garden Caddy

4/11 & 5/23, 1-5pm Cost: \$30.00

Build something beautiful and useful for your garden! In this hands-on workshop, you'll build your own wooden garden caddy, perfect for carrying tools, seeds, or small plants. Our instructor will guide you through each step, while creating a sturdy and attractive project you'll be proud to take home and use.

Experience Level: Beginner-friendly

Make Your Own Knife

This is a 2-session workshop:

I - 1/10,

II - 1/17, 1-3pm each &

I - 6/13, 1-3pm,

II - 6/15, 6-8pm Cost: \$30.00

Create a one-of-a-kind knife by assembling and finishing a handle with a pre-made steel blade. In this hands-on workshop, you'll shape, sand, and attach the handle, then polish and finish your knife for a professional look. Our instructor will guide you through each step and you'll leave with a custom, ready-to-use knife.

Experience Level: Beginner-friendly

Career Development / Licensure & Certification

Make & Take a Bed Step Stool

2/28 & 5/30, 1-5pm Cost: \$50.00

Build a sturdy and stylish wooden step stool that's both practical and attractive! In this hands-on workshop, you'll learn how to measure, cut, assemble, and finish your own bed step stool, perfect for adding function and charm to any bedroom. Our instructor will guide you through each step and you will leave with a personal handmade step stool.
Experience Level: Beginner-friendly

Make Your Own Wine Bottle Stopper

3/9 & 6/22, 6-8:30pm Cost: \$20.00

Turn your creativity into something truly functional! In this hands-on workshop, you'll craft a custom wooden wine bottle stopper using the lathe. Our instructor will guide you through each step and you'll leave with a beautiful, handcrafted piece that's perfect for your home or as a thoughtful gift.
Experience Level: Beginner-friendly

Make & Take a Bluebird Nesting Box

5/11, 6-8:30pm Cost: \$20.00

Build a cozy home for bluebirds while learning basic woodworking skills! In this hands-on workshop, you will measure, cut, assemble, and finish a wooden nesting box. Our instructor will guide you through safe tool use and finishing techniques, ensuring a sturdy and attractive project that supports local wildlife.
Experience Level: Beginner-friendly

Make Your Own Bowl on the Lathe

2/21 & 4/25, 1-5pm Cost: \$40.00

Turn a block of wood into a beautiful, functional bowl in this hands-on woodturning workshop! You will learn how to safely operate a lathe while shaping, smoothing, and finishing your own wooden bowl. Our instructor will guide you through each step and you'll leave with our own handmade bowl.
Experience Level: Intermediate

Make & Take a 4-Drawer Storage Unit

3/28 & 6/6, 1-5pm Cost: \$50.00

Build a functional and stylish wooden storage unit perfect for organizing your workspace, craft supplies, or household items. In this hands-on workshop, you will assemble, sand, and finish a four-drawer unit while learning key woodworking techniques. Our instructor will guide you through each step to produce a stylish handmade storage unit.
Experience Level: Intermediate

Make & Take a Riding Rocking Horse

3/7 & 6/20, 1-5pm Cost: \$50.00

Build a classic wooden riding toy that's sure to become a family favorite! In this hands-on workshop, you'll assemble, sand, and finish your own child-sized rocking horse. Our instructor will guide you through each step. This timeless project blends creativity with craftsmanship.
Experience Level: Intermediate
