### TRANSFER ADMISSION

At University of Phoenix, you can earn your bachelor's, master's or doctoral degree any way you want to – on campus, online, or in certain areas using a combination of both. University of Phoenix has grown to be the nation's largest private university, specializing in the education of working adults by offering degree programs that are highly relevant, accessible, and efficient. With over 100 campuses and learning centers in the United States, Puerto Rico, Canada and via the Internet, you can complete your degree no matter where you live, what hours you work, or how often you travel or relocate.

University of Phoenix has established several articulated programs with Allegany College of Maryland that lead to bachelor's degrees in Business, Nursing, and Information Technology

Contact your advisor, the [Student Success Center](#) at (301) 784-5551, or a Pennsylvania Student Services for additional information.

#### **Bachelor of Science in Business/Accounting**

The Bachelor of Science in Business/Accounting program promotes identification with and orientation to the accounting profession, and is designed to provide the knowledge, skills and abilities necessary to a successful accounting career. Core competencies in technology, critical thinking, and communication are emphasized throughout the curriculum.

#### **Bachelor of Science in Business/Administration**

The Bachelor of Science in Business/Administration program is designed for the working adult employed in a business or public organization. The major is designed to enable graduates to deal effectively with an increasingly complex business environment. The major stresses skill development in the areas of financial accounting, managerial finance, quantitative analysis, economics, marketing, and business-based research.

#### **Bachelor of Science in Business/e-Business**

The Bachelor of Science in e-Business (BSB/EB) Program blends business and information technology to address the emerging field of e-Commerce and e-Business. The program courses provide fundamental knowledge and application in both business and information technology.

### **Bachelor of Science in Business/Finance**

The Bachelor of Science in Business/ Finance (BSB/F) program is designed for the working professional employed by a business or public organization. The program of study is designed to enable graduates to deal effectively with an increasingly complex business environment, emphasizing the professional and personal skills needed for effectively meeting organization needs. The Finance major emphasizes fundamental accounting and finance concepts, theories, and practice to promote well-informed financial decision-making. Students will integrate advanced topics in financial management through real-world business application.

### **Bachelor of Science in Business/Management**

The Bachelor of Science in Business/Management is designed for the working adult who wants to acquire or build knowledge and skills essential for management in private and public organizations. The curriculum emphasizes performance systems, employment law, marketing and public relations, financial analysis, global business strategies, and quality management.

### **Bachelor of Science in Business/Marketing**

Marketing managers need creative, analytical and leadership abilities to manage the marketing function of the business enterprise. The Bachelor of Science in Business/Marketing program addresses how to identify customer needs, how to communicate information about products and services to customers and potential customers, where to market and how to price products and services, and how to respond to growing demands to markets in different countries and cultures.

### **RN to Bachelor of Science in Nursing**

The Bachelor of Science in Nursing (BSN) program is designed to develop the professional knowledge and skills of working registered nurses. The curriculum is built upon a foundation of biological, physical, and social sciences which contribute to the science of nursing. The liberal arts components enhance the development of the intellectual, social, and cultural aspects of the professional nurse.

### **Bachelor of Science in Information Technology**

The Bachelor of Science in Information Technology (BSIT) program is focused on the acquisition of theory and technical competencies associated with the information technology profession. The courses provide fundamental knowledge and application in both the information systems function and in system development.
